*I was thinking the other day about you Betty. I remember the time that I was trying to assist you in learning how to drive, we would get in that car and laughed so hard about something or another. You would tell me, "Gwen I want you to make a sign saying Betty you are still driving because sometimes I forget. "*

*Girl I still miss you so much even though in later years we work together that much. When we did reconnect it was like nothing had changed. I know you are standing in the glorious light of God and worshipping him. Love you.*
